## ADMINISTRATIVE RECORD

- 1) Burnett's want to store truck load of insulation in Planer Building. They are still running the Planer but seems to be good idea since cleaned & he has access now.
- 2) He, Joe & Dave (CURS sitting in br. table) looked @ bid drawings & wants changes. Dave agreed, but he is worried Stuart may not agree if Dave takes changes to him first.
- 3) CDM & PES need to take to Mel Burnett. They are not sure if CDM & PES are checking everything being moved out of the big wooden building. I guess he thinks he may already lost a piece of peg board & plywood. I guess ~~the~~ they said they were broken & so they threw them out. Mel is not sure if they were broken before they went in to clean the materials, but he doesn't think they were broken. Mel says it is not a big deal, but that if they could be present more often it would make them feel better.

~~Also that then~~

Solution may be to have Joe walk through with them prior to any action. If not addressed then or during cleaning then it is a cost incurred.

Mel Br. does not want this blown out of the water. Just something they are uneasy about. He wants myself or someone to give him the word on this.
